

GREEN WORKWEAR
JUST SUSTAINABLE

G
G

THE *Green Workwear* GMBH

When two are pursuing the same goal, there are good reasons to walk the path together. This is how the cooperation between Dibella longlife textiles and REISINGER premium workwear came to life. Our common goal is to develop a 100% sustainable workwear collection for the healthcare sector that is suitable for industrial laundering.

"With all Green Workwear products that are certified with the Green Button, you are acting in compliance with the German Supply Chain Act. With us you are on the safe side!"

KLAUS BAUR

Dibella longlife textiles was founded in 1986 and is a recognised textile service partner throughout Europe. With a corporate philosophy focussing on fairness and openness, the company has a professional supply chain management system with in-depth knowledge in the areas of sustainability, recycling and reprocessing.

REISINGER premium workwear was founded in 2007 by Harald Reisinger and has stood for the distribution of industrially launderable workwear for the healthcare sector from the very beginning. Harald Reisinger has been active in the field of clothing production and sales since the 1990s.

Together, under the umbrella of Green Workwear GmbH, we offer a professional partner for customers in the textile service and healthcare sector.

"Our guiding principle at Green Workwear: We take responsibility for the environment and all those involved in the supply chain."

HARALD REISINGER

PREMIUM
WORK WEAR

PEOPLE SHOULD BE ABLE TO WORK IN CLOTHING THAT FITS PERFECTLY.

FOR *people*

We work towards this goal with a great deal of passion and commitment.

By 2030, we will achieve an optimal balance between socially and ecologically responsible production and a far-sighted resource economy.

For example, we will only use fair trade organic cotton, TENCEL™ Lyocell, recycled polyester,

Cotton made in Africa (CmiA) cotton or other sustainable fibres for our particularly durable textiles.

We keep our supply chains absolutely transparent and supplement this with recognised and demanding seals and standards for our production partners.

By 2030, we aim for all of our products to be 100 %

AND THE *Environment.*

upcyclable and our entire process chain to be 100 % climate neutral.

Our self-commitment applies to our external actions as well as our internal ones: together with all employees, we are committed to continuously reduce our corporate carbon footprint and realise concepts that benefit everyone.

OUR Certificates

GREEN BUTTON

With the Green Button, you are buying sustainably, socially and ecologically produced textiles: As a state seal for textiles, the Green Button is particularly trustworthy and is becoming increasingly important.

COTTON MADE IN AFRICA

With Cotton made in Africa, we are making our business model more sustainable. This enables us to minimise the environmental impact of our company and support the people in the local growing areas.

GLOBAL RECYCLED STANDARD

Certification in accordance with the Global Recycled Standard (GRS) guarantees recycled textiles with additional ecological and social criteria. At Green Workwear, we use 100% recycled polyester and guarantee traceability along the entire supply chain as well as transparent communication.

OEKO-TEX™ MADE IN GREEN

When you buy products with the "OEKO-TEX® MADE IN GREEN" label, you receive textiles that

have been tested for harmful substances and are manufactured in sustainable factories. Each production step is traceable and can be accessed transparently via the homepage.

**BREATHABLE, COMFORTABLE
AND MADE FROM SUSTAINABLE RAW MATERIALS:**

Excellence

Woven from 50 % Cotton (CmiA) and 50 % recycled polyester.

Particularly breathable and comfortable to wear. Quick-drying and durable thanks to the polyester content.

Available in six colours with a basis weight of 190 g/m² as well as in white with 210 g/m².

OUR *fabrics*

Comfort

Woven from 50 % Lyocell (TENCEL™) and 50 % recycled polyester.

TENCEL™ Lyocell

TENCEL™ fibres are cellulose fibres obtained from sustainable wood. They are very robust, abrasion-resistant, soft and plain and have a cooling effect.

TENCEL™ fibres are of purely natural origin, offer a very special wearing comfort and a uniquely soft feel. TENCEL™ is a brand of Lenzing AG.

Available in four colours and white with a basis weight of 195 g/m².

Further colours planned!
